"Counting Birds: An Exercise in Estimating Numbers"

by

Hugh Kingery

Bring paper and pencil

7:30 P.M. Denver Museum of Natural History (New auditorium - west side)

The editor would like to express his appreciation and thanks to all the area leaders, observers and feeder watchers on the 1974 Denver Christmas Bird Count. Because of your assistance the count was very successful and my job of compilation was made easier. Thank you again for your participation.

BIRDS OF 161 DEL MAR CIRCLE, AURORA, COLORADO

Mildred Snyder, DFO member has observed a total of 115 species of birds in and from her yard at 161 Del Mar Circle, Aurora, Colorado since she moved in during early 1960. Sixty-six of these have been banded since 1963. This was a model house, the first home in the area. There were fields beyond, no sidewalks, no trees and shrubs as there are now. The following is a list of species observed by years in the order they were observed. Only new species observed are listed after the first observation. First banding for each species is noted by # if the same as first observation. In other cases the date is listed. Date of observation is noted with the exception of one species.

REPORT FROM THE CFO OFFICIAL RECORDS COMMITTEE: The CFO Official Records committee has completed its review of reports of rare or unusual species which were received during 1974. Volume 9, Number 11 of The Lark Bunting specified that a summary would be published periodically by DFO for those reports which were submitted and published during the year in their publication. A listing of those records and their acceptance or rejection follow. Observers are shown with accepted records. Some observers failed to submit reports of their unusual sightings. The Records Committee urges all observers, Colorado field ornithologists and bird watchers to submit documentation for all rare or unusual species that they find within the state. The Records Committee will gladly supply a copy of their Sight Report Form upon request to use in preparing written documentation. To obtain a copy, contact Jack Reddall, 4450 South Alton St., Englewood, Colorado 80110. A list of those species considered by the Records Committee to be rare or unusual can be found in Volume 9, Number 8 of The Lark Bunting. A more complete and detailed report covering all records of rare and unusual species reviewed during 1974 by the Official Records Committee will appear in a forthcoming issue of the Colorado Field Ornithologist.

Jack Reddall, Chairman

CFO OFFICIAL RECORDS COMMITTEE

DFO FAMILY PICNIC: Tuesday, May 27, 1975. 5:00 PM and on at the Shelter House at the Group Picnic Area at Cherry Creek State Recreation Area. A family picnic will replace the regularly scheduled May DFO meeting. The shelter house is reserved for DFO and families. Members who do not have an annual State Parks Pass are asked to call a committee member if they need a ride from a designated parking area. Daily passes may be purchased for \$1 per car at either the east or west gate of the Recreation Area. PLEASE BRING YOUR OWN FOOD, BEVERAGE AND EATING UTENSILS. Charcoal burners are available at the site. Bring your own charcoal. Birding should be good along the nearby nature trail. At 7:30 PM a short business meeting will be held, with an informal program of vacation birding trip reports by several members. For reservations and further information, call: Patty Echelmeyer, 233-4947. Henry Bossman, 781-6855. or Margo Chadwick 321-1212. Map as follows:

Know of any nesting hawks or owls? Please call Bill Gillespie -755-8729. He will reward those providing usable sights with a photograph of the bird.

I 76 ENVIRONMENTAL IMPACT STUDY: Patsy Goodman, an employee of the Colorado State Highway Department-Environmental Division would like pertinent bird observations from along Clear Creek east of Sheridan Blvd. Observations should be sent to Patsy Goodman 650 S. Corona St., Denver, Colorado 80209 Phone: 777-8395.

AMERICAN BIRDS SPRING MIGRATION DATA IS NEEDED BY JUNE 5: PLEASE send your data to Bob Andrews, 1390 South Ivy Way, Denver, Colorado 80222. Phone: 756-5553. Summer arrivals. Winter departures. Do they seem to be early, normal or late? Are numbers high, normal or low? Are there any invasions, trends? Unusual species. This is some of the information which could be helpful.

TRIP LEADERS PLEASE NOTE: PLEASE SEND YOUR REPORTS, USING THE DENVER FIELD ORNITHOLOGISTS AREA CHECKLIST OR OTHER APPROPRIATE CHECKLIST, OR LIST IN CHECKLIST ORDER, AS SOON AS POSSIBLE AFTER EACH TRIP TO DAVID HUTCHINSON, 9141 STUART ST., WESTMINSTER, COLORADO 80030. CORNELL NESTING RECORD CARDS: Continue thinking about nesting records. be making observations, collecting data. Contact Nancy Hurley, 1875 S. Adams St., Denver, Colorado 80210. Phone: 757-0837. for further information or nesting cards.

CLUB OWNED TELESCOPE: The club scope, a 15-60 X 60 scope is being stored by David Hutchinson, 9141 Stuart St., Westminster Phone: 428-3922. Please feel free to use it.

1975 CFO - OFFICIAL RECORDS COMMITTEE REVISED LIST OF SPECIES DESIGNATED ACCIDENTAL OR CASUAL. The CFO-Official Records Committee desires documentation on the species included in this list or any species new to the state. Complete details should be submitted to Mr. Jack Reddall, Chairman, 4450 South Alton St., Englewood, Colorado 80110. In addition documentation is desired for birds which have wandered outside of their normal range within the stat. The CFO Sight Record Form is available from Mr. Reddall. Detailed information may be submitted with the following format.

1. SPECIES(the name of the species and the number of individuals)
2. LOCALITY(the exact location of the observation. eg. 2 miles n of Ft. Morgan, Morgan County)
3. DATE(include the time of day and the duration of the bird's stay as well as the date)
4. OBSERVERS(include the names and addresses of others observing the bird)
5. OPTICAL EQUIPMENT(include the type and power of optical equipment used)
6. HABITAT(describe the habitat in which the observation was made)
7. DESCRIPTION(include a detailed description of the bird's appearance with emphasis on the color and pattern of plumage, size and shape, behavior, voice and other pertinent data. Repost only what you actually observe)
8. CONCLUSIONS(reasons for identification; how were other similarly appearing birds eliminated?)
9. EXPERIENCE(familiarity with the reported species and similar species)
10. ADDITIONAL MATERIAL(attach drawings, sketches, photographs, tape recordings, etc. if available.)

1975 Spring Wildlife Count in Eastern Douglas and Western Elbert Counties; Summary by Jim Hicks, Colorado Division of Wildlife.

On April 19, 1975, 62 participants recorded 7 species of mammals (71 individuals) and 77 species of birds (2,405 individuals) during an early morning wildlife count. Representatives from conservation groups and agencies included, Aiken Audubon Society, Denver Audubon Society, Bureau of Land Management and Division of Wildlife.

Participants counted along roads in eastern Douglas, western Elbert, and parts of northern El Paso counties, covering approximately 1,000 square miles. The area was divided into 16 counting units. Four known dancing grounds of sharp-tailed grouse were observed, however, only two grounds had active, dancing male, sharp-tail on them. The participants met in Castle Rock at 4:45 a.m. By 5:30 a.m. they were assigned to specific areas. The participants drove slowly on the roads in their units and some areas were hiked through. Everyone met back at Castle Rock at 10:30 a.m. to tally the count.

The weather was excellent for counting, with few clouds. Temperatures ranged from the mid-thirties into the mid-sixties, with little wind.

A total of 50 sharp-tailed grouse were counted (41 in 1974). Grouse were heard at one other location. Only two dancing grounds out of the four were historical grounds found to be active. The Winkler grounds did not have any active males this year, but eight have been seen in the vicinity. Twenty were counted on the Cherokee Ranch that were not counted last year. Twenty-two were grouse were seen on another ranch that was not counted on April 19. Some of these populations have probably changed their dancing grounds. The grouse population appears to remain stable, at approximately 100 to 200 birds in the area.

This was a very successful spring count. It provided important species information that will be used for Land Use Bill 1041. Hopefully we can have this count each year, and over the years it will provide a means of monitoring the status of different species, especially the threatened Prairie sharp-tailed grouse.
